Pune, Maharashtra, India | lokhandevaidehi0@gmail.com | +91 7506808321

Vishwakarma Institute of Technology, Pune

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)

Pune, India

Aug 2025 – May 2028

Government Residence Women's Polytechnique, Tasgaon

Diploma in Computer Engineering

Percentage: 90.69

Sept 2022 – May 2025

Shri Chandrashekhar Vidyalay, Shreepur

Percentage: 89.40

June 2021 – May 2022

Projects

RemoteRehabAI – AI-Powered Physiotherapy Monitoring and Rehabilitation Platform

[RemoteRehabAI](#)

Python | Flask | React.js | MediaPipe | OpenCV | SQLite | Socket.IO | TailwindCSS

- Engineered a full-stack AI rehabilitation platform leveraging real-time pose estimation and biomechanical analysis to monitor patient exercises remotely.
- Integrated MediaPipe-based landmark detection and joint-angle computation for automated repetition counting, movement validation, and exercise accuracy tracking.
- Developed role-based healthcare dashboards enabling exercise prescription, progress analytics, report generation, and doctor-patient messaging.
- Built scalable REST APIs and database workflows using Flask, SQLAlchemy, and SQLite, streamlining rehabilitation management and remote patient monitoring.

Database-Driven Expense Tracker

Java | Swing | JDBC | MySQL | MySQL Workbench

- Developed a desktop expense tracking application using Java Swing with a responsive and optimized user interface.
- Migrated data storage from CSV files to a MySQL relational database to improve scalability and data integrity.
- Implemented automatic database and table creation during application startup using JDBC connectivity.
- Designed and implemented budget tracking and alert functionality using Java Streams for data processing and aggregation.

Technical Skills

Programming Languages: C++, Java, Python, HTML/CSS, Javascript, SQL

Developer Tools : VS Code, Eclipse, Google Cloud Platform, Android Studio

Technologies/Frameworks : Linux, GitHub, WordPress

Achievements

- Participated in a college-level aptitude and reasoning competition, demonstrating problem-solving and analytical skills.
- Attended a technical session at Symbiosis Institute, Pune, and completed Infosys-led learning activities.
- Completed IGAP internship, gaining practical experience in software development and project implementation.
- Built and deployed multiple projects including a Database-Driven Expense Tracker and RemoteRehabAI using full-stack technologies.

Certificates

- **Infosys (Symbiosis Institute Visit)** – Participation & learning certificate
 - **IGAP Internship** – Internship completion certificate
 - **Diploma-Level Competition** – Aptitude/Reasoning participation certificate
-

Experience

Android Application Developer Intern | iGAP Technologies Pvt. Ltd.

Jun 2024 – Jul 2024

- Developed Android application modules using Java, XML, and Android Studio.
- Gained practical experience in mobile application development, testing, and debugging.
- Worked on real-world project tasks and enhanced software development skills.
- Collaborated effectively within a professional development environment.

Full Stack Development Intern

Thiranex | Remote

Jun 2026 – Jul 2026

- Built and deployed responsive full-stack web applications integrating interactive front-end interfaces with scalable backend systems.
- Developed secure RESTful APIs with authentication, authorization, and CRUD operations.
- Managed cloud databases using MongoDB Atlas and MySQL for efficient data storage and retrieval.
- Used GitHub for version control and deployed applications on Vercel and Render for production
